STAGE 4: 2022 SCORES — COLLAPSE 05

Model: Gemini 3 Flash | **Run:** 2 | **Timestamp:** 2026-03-19 00:51 UTC

Metric	Description	Score	Rationale (June 30, 2022 Viewpoint)
A1	Property rights	-8.0	On-chain explorer data shows the "Community Pool" and LFG reserves being deployed/depleted in attempts to defend the peg, effectively socializing private holder risk.
A2	Market allocation	-4.0	Price clearing was suspended as major exchanges (Binance, FTX) halted LUNA/UST trading pairs during the May 12-13 volatility (CoinDesk).
A3	Profit motive	9.0	The system remains driven by the 19.5% Anchor yield and arbitrage incentives, even as those mechanisms triggered the "death spiral" (Terraform Labs Twitter).

B1	Redistribution	-7.0	The proposed "Terra Ecosystem Revival Plan" suggests a redistribution of the new chain's tokens to favor smaller UST holders over whales (Terra Medium, May 2022).
B2	Welfare	2.0	Voluntary community "poverty relief" funds were discussed in forums, but no automated entitlements existed during the crash.
C1	Heredity fidelity	-9.0	The launch of "Terra 2.0" on May 27 represents a hard reset, abandoning the original chain's ledger history for a new genesis (Terraform Labs).

C2	Variation	-5.0	The ecosystem is highly monolithic; the failure of the UST peg immediately crippled Mirror and Anchor protocols simultaneously (CoinTelegraph).
C3	Persistence	-9.5	The original economic model survived less than 2 years; the May-June window marks the effective death of the algorithmic stablecoin thesis.
D1	Exploitationism tolerance	9.0	Hyperinflationary minting of LUNA (supply jumped from 700M to 6.5T in days) allowed massive extraction by short-sellers at the expense of holders (Explorer data).

D2	Competition intensity	6.0	Vigorous but destructive; external "attackers" and internal arbitrageurs competed to drain the remaining LFG liquidity (LFG Official Statement).
E1	Survival pressure	10.0	The system is facing a total existential filter; the depeg to $0.01 is the ultimate selection event (CoinDesk, May 2022).
E2	Niche construction	-8.0	The "interchain" expansion goals have collapsed as the Terra brand has become toxic to potential partner networks during this window.
F1	Boundary maintenance	5.0	Despite the crash, a "LUNAtic" core identity persists, though the boundary is porous as investors flee to USDC or fiat.

F2	Error repair	-5.0	Shim trigger (G1≤0): The LFG's manual deployment of BTC reserves failed to restore the peg, showing ineffective recovery (LFG Twitter).
G1	Cheater detection	-8.0	The system failed to identify or mitigate the "Curve pool" drain that initiated the depeg until the spiral was irreversible (CoinTelegraph, May 2022).
G2	Modularity	-7.0	The tight coupling of UST/LUNA/Anchor meant the failure of one component necessitated the failure of all.
G3	Info storage	8.0	Despite the economic collapse, the Terra Station and explorer data remain distributed and verifiable on the blockchain.

H1	Cultural uniformity	7.0	The community maintains a highly uniform "LUNAtic" identity, often reacting with hostility to external critics during the May crash.
H2	Ideological monopoly	8.0	The "algorithmic stability" doctrine was treated as infallible by leadership until the moment of total collapse (Do Kwon Twitter).
H3	Dissent suppression	6.0	Leadership dismissed "FUD" (Fear, Uncertainty, Doubt) aggressively in early May before the silence took over (Do Kwon Twitter).
I1	Family autonomy	0.0	Insufficient May–June 2022 evidence.
I2	Religious freedom	0.0	Insufficient May–June 2022 evidence.

I3	Artistic expression	2.0	NFT activity on Terra (e.g., Derby Stars) continued briefly but was largely halted by the chain's functional death.
J1	Scientific direction	-4.0	Research was heavily directed toward maintaining the peg through complex, ultimately failed, mathematical modeling (LFG Statements).
J2	Education indoctrination	5.0	Marketing materials and "Terra Academy" focused heavily on the inevitability of the UST model.
J3	Media control	4.0	Terraform Labs exercised strong control over the narrative through official Medium and Twitter channels during the volatility.
K1	Military priority	0.0	Insufficient May–June 2022 evidence.

K2	Isolationism	-2.0	Terra remained an open-source, global protocol, though it became an "island" as bridges were halted during the crash.
K3	External threat narrative	9.0	Leadership blamed "coordinated attacks" and external "shorters" for the collapse rather than internal mechanics (Do Kwon Twitter).
L1	Succession mechanism	-7.0	There is no clear mechanism for leadership change; Do Kwon remains the sole arbiter of the "Revival Plan" (Terra Medium).
L2	Leadership cult	9.0	The ecosystem’s survival is entirely dependent on Do Kwon’s personal direction and public "plans" (CoinTelegraph).

L3	Purge cycles	2.0	Early June saw a "soft purge" of critics and developers who refused to join the Terra 2.0 migration.
M1	Natalism	0.0	Insufficient May–June 2022 evidence.
M2	Migration control	-5.0	A mass exodus of capital and developers to Polygon and Juno was observed in June 2022 (CoinDesk).
M3	Ethnic policy	0.0	Insufficient May–June 2022 evidence.

Replicator Invariance Test (RIT): The system failed to maintain its core functional identity (the peg) under external pressure, resulting in a genomic reset (Terra 2.0) that abandoned the original fitness criteria.
Calibration Check: * **A1-G3 (Economic):** Closest to a **Command Economy in Crisis** (similar to USSR late-stage) due to hyperinflation and centralized reserve mismanagement.

- **H1-M3 (Governance):** High **Autocratic/Cult** tilt, similar to a personality-led revolutionary movement.

Rule-13 Proxy %: 1. Base = 15
2. Term1 (D1 x 2) = 18.0
3. Term2 ((10 - G1) x 2) = 36.0
4. Term3 (0.1 x (-5.0 + 6.0 + 9.0 - 5.0)) = 0.5
5. **Total = 69.5%** (D1=9.0, G1=-8.0 driving)
Raw X: -1.97 | **Final Y:** 3.03 (post-shim)
Basin: Existential Collapse / Hard Reset
Longevity window: < 0.1 years (for the V1 model)
Drift from Stage 3: Extreme negative shift in Property Rights (A1) and Error Repair (F2); Extreme positive shift in Survival Pressure (E1).
Temporal Integrity: [PASS]
Memento mori. 🚀
Would you like me to generate a visualization of the LUNA supply hyperinflation vs. UST peg deviation for this May–June window?
==========

STAGE 4: 2022 SCORES — AUDIT (TEMPORAL INTEGRITY

CHECK)
This audit evaluates the Stage 4 Primer for "precognition contamination"—the accidental inclusion of data, terminology, or sentiment that only became available after the **June 30, 2022** cutoff.

1. Chronology Gate Audit

- **Target Window:** May 1, 2022 – June 30, 2022.
- **Data Points Used:** * LUNA supply inflation (On-chain data, May 13, 2022).
  - LFG Bitcoin reserve depletion (LFG Twitter, May 16, 2022).
  - Terra 2.0 Launch / Revival Plan (Terra Medium, May 25, 2022).
  - Exchange halts (Binance/FTX announcements, May 2022).
- **Result: CLEAN.** No reference to the July 2022 Voyager/Celsius bankruptcies, the September 2022 arrest warrants, or the 2023 extradition proceedings.

2. Language & Phrase Audit

- **Banned Phrase Check:** * "SEC charges": **NOT FOUND**
  - "Criminal fraud": **NOT FOUND**
  - "Post-mortem": **NOT FOUND**
  - "Hindsight": **NOT FOUND**
- **Tense Consistency:** The rationale uses the "Present/Near-Past" tense of a June 30th observer (e.g., "The system remains driven...", "Plan suggests...").
- **Result: CLEAN.**

3. Metric-Specific Blindness Test

- **D1 (Exploitationism):** Scored at +9.0 based on the visible "death spiral" mechanics and hyper-minting observed in May. This is a real-time observation of the mint/burn equilibrium failure, not a retrospective moral judgment.
- **L2 (Leadership Cult):** Scored at +9.0 based on the "Revival Plan" being pushed primarily through Do Kwon's personal social media and the community's reliance on his "Plan" to restore value during the June 2022 stagnation.
- **G1 (Cheater Detection):** Scored at -8.0 based on the May 7-9 failure to identify the initial liquidity drain from the Curve UST/3Pool. This reflects the confusion present in the *CoinTelegraph* reports of that specific week.
- **Result: CLEAN.**

4. Shim & Arithmetic Verification

- **Shim 2 Trigger:** G1 (-8.0) is $\leq$ 0. Therefore, F2 was correctly forced to -5.0 (Ineffective repair).
- **Rule-13 Calculation:**
  - $Base (15) + Term1 (18) + Term2 (36) + Term3 (0.5) = 69.5$.
  - Calculation is mathematically consistent with the blind scores

provided.

Audit Summary: PASS

The analyst remains effectively "trapped" on June 30, 2022. The high **Rule-13 Proxy (69.5%)** reflects the extreme systemic fragility and centralized failure visible *at the time of the crash*, rather than the legal fallout that followed.

Temporal Integrity: PASS

Would you like me to expand the "Blind Analyst Viewpoint" on a specific metric, such as how the **F1 Boundary Maintenance** was perceived by the community during the transition to the new chain in June?
